

Global Manufacturer of Metalworking Fluids, Industrial Lubricants & Cleaners

ArrowDraw & ArrowStamp

Drawing & Stamping Products

Visit www.chemarrow.com to learn more about our full line of metalworking fluids & to read case studies from actual customers.

ArrowDraw & ArrowStamp lubricants are formulated with some of the most advanced anti-friction and “extreme pressure” technology to prevent metal to metal contact with tooling, dies and finished components. The ArrowDraw & ArrowStamp product line has been developed to provide superior performance and overall cost effectiveness while being compatible with today’s stringent operating and environmental standards.

Chem Arrow’s new line of synthetic metal forming lubricants utilizes

sophisticated polymer and bio-based “vegetable” technology to help promote environmental safety and hazardous waste reduction. These “next generation” lubricants offer performance benefits such as higher film strength, as well as thermal and oxidation resistance, that can greatly enhance overall efficiency. ArrowDraw and ArrowStamp lubricants have been used successfully on both ferrous and non-ferrous metals including stainless steel and titanium.

-  Extends tool and die life
-  Reduces galling & scratching
-  Multi-purpose
-  Superior finishes
-  Extreme pressure properties
-  AQMD super compliant/
compliant
